C4CC - HEADLINES

Welcome to the fourth newsletter of the C4CC project! We are pleased to present you with the latest information from our innovative project. As we continue to make progress, we would like to update you on our results to date and upcoming milestones.

Just to refresh your memory, our project aims to raise awareness about the climate change challenges through international learning model, bringing together young digital natives and senior learners.

Project partners from Ireland, Croatia, Germany, Cyprus, Romania, Malta and Italy finished their national versions of the **Calendar for Climate Change** that addresses climate change challenges that are appropriate for each month of the year. We're working on making these resources to be available on smartphones by developing **Calendar for Climate Change Mobile App!**

Quid-Pro-Quo – Inter-generational
Education to Ease Global Warming

TEACHER TRAINING IN RIJEKA, CROATIA

From 18 to 20 April 2023, adult educators from all partner countries met in Rijeka, Croatia, to participate in teacher training which was organised by our Croatian partner DANTE. From 18 to 20 April 2023, adult educators from all partner countries met

in Rijeka, Croatia, to participate in teacher training which was organised by our Croatian partner DANTE. The aim of the training was to get acquainted with the project, its topics, and resources, intergenerational learning module that ensured that adult educators are fully trained to harness the potential of the project resources.

UPCOMING MILESTONES

Looking ahead, we have two exciting milestones in the next six month period. First, our Irish partners organise a 5-day workshop in July 2023 in Virginia with one senior and one digital native from each partner country. The plan is to form inter-generational, intercultural teams and to facilitate discussion and active working sessions to brainstorm and assess the low-tech and high-tech solutions that have been developed in each partner country. Secondly, partners will implement the training and a minimum of 8 adult educators will complete the in-service training in each partner country.
